

FLEXIMAKE HEAVY DUTY TARP

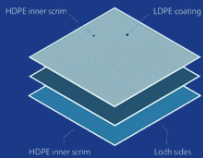

Protect Anything, Anywhere

PE-260GSM

KEY FEATURES

260 GSM PE – HDPE
REINFORCED, LDPE
COATED BOTH SIDES

WATER PROOF AND
UV RESISTANT

FASTEN WITH
BRASS EYELETS OR
STAINLESS D-RINGS

LIGHTWEIGHT
& DURABLE

REINFORCED ROPE
EDGES

HIGH TEAR STRENGTH
& FLEXIBILITY

FAST NATIONWIDE
DELIVERY

WIDE RANGE
OF SIZES

EXCEPTIONAL
CUSTOMER SERVICE

APPLICATIONS OF OUR HEAVY DUTY TARPS – 260GSM

- Hay, grain & stockpile covers
- Builders, construction & machinery protection
- Boats, caravans & camping
- Emergency shelters & storm relief
- Custom tarps for any project

FACTORY (VIC): 33 TATTERSON RD, DANDENONG SOUTH VIC 3175
PHONE: 1300 195 295 | 03 8772 2228 (VIC)

OFFICE/STORE (NSW) : UNIT 2/ 36 HOLBECH RD, ARNDELL PARK, NSW 2148
| PHONE: 02 8610 2228 (NSW)

FLEXIMAKE EXTRA HEAVY DUTY TARP

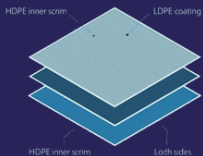

Ultimate Protection for Tough Conditions

PE-320GSM

KEY FEATURES

**320 GSM PE – HDPE
REINFORCED, LDPE
COATED BOTH SIDES**

**WATER PROOF AND
UV RESISTANT**

**FASTEN WITH
BRASS EYELETS OR
STAINLESS D-RINGS**

DURABLE & TOUGH

**REINFORCED ROPE
EDGES**

**HIGH TEAR STRENGTH
& FLEXIBILITY**

**FAST NATIONWIDE
DELIVERY**

**WIDE RANGE OF
SIZES**

**EXCEPTIONAL CUSTOMER
SERVICE**

APPLICATIONS OF OUR HEAVY DUTY TARPS – 320GSM

- Temporary roof / Floor protection during build
- Construction & equipment protection
- Agricultural stockpiles
- Boats, caravans & camping
- Emergency & storm relief
- Custom-sized projects

MAIN OFFICE / FACTORY (VIC): 33 TATTERSON RD, DANDENONG SOUTH VIC 3175
PHONE: 1300 195 295 | 03 8772 2228 (VIC)

OFFICE/STORE (NSW) : UNIT 2/ 36 HOLBECHE RD, ARNDELL PARK, NSW 2148

FLEXIMAKE LIGHTWEIGHT TRUCK TARP RPE-275GSM

Lightweight yet durable tarp designed for everyday truck hauling

KEY FEATURES

**275 GSM COATED
RPE WITH
REINFORCED WEAR
ZONES**

**WATERPROOF,
TEAR-RESISTANT &
UV-STABILISED UP
TO 3 YEARS**

**DUAL D-RING ROWS
FOR EASY TARP
SHORTENING**

**HIGH VISIBILITY
SAFETY DESIGN**

**10 MM PE ROPE
WITH STITCHED
END LOOPS**

**HIGH TEAR
STRENGTH &
FLEXIBLE FABRIC**

**FAST NATIONWIDE
DELIVERY**

**WIDE RANGE
OF SIZES**

**EXCEPTIONAL
CUSTOMER SERVICE**

KEY BENEFITS

- **Lightweight & Strong** – Easy to handle without sacrificing durability
- **Durable & Abrasion-Resistant** – Reinforced High-Wear Zones
- **Weather Resistant** – Waterproof, Tear-Resistant & UV-Stabilised (Up to 3 Years)
- **Secure D-Ring Tie-Downs** – Keeps loads safely covered during transport
- **High Visibility Design** – Bright blue with white safety stripes
- **4 Size Options** – Fits Standard Truck Bodies

Tips for Choosing Tarps Wisely

When choosing a tarp, consider key factors that contribute to its strength, durability, and reliability.

1. True Heavy-Duty Fabric?

Many tarps claim to be "heavy duty," but fabric quality varies greatly. Look for:

- High GSM (200+ GSM recommended)
- High weave density for strength and flexibility

Fleximake / Tarpfactory Tarps:

- Heavy-duty PE: 260 GSM, 14 × 14 weave
- Extra heavy-duty PE: 320 GSM, 14 × 14 weave
- Lightweight truck tarp RPE: 275 GSM, 16 × 16 weave

Designed for maximum durability and performance in every application.

2. UV Protection for Outdoor Use

Australia's harsh sun can quickly damage low-quality tarps.

Fleximake / Tarpfactory Tarps:

- ✓ UV treatment on both coatings and the inner scrim
- ✓ Long-lasting protection against sunlight and outdoor exposure

3. Tear Strength & Flexibility Matter

A heavy-duty tarp should resist tearing while remaining flexible in wind and movement.

Fleximake / Tarpfactory Tarps:

Our tarp fabrics are tested for tear strength and elongation, ensuring reliable performance in demanding conditions.

4. Strong Eyelets Make a Big Difference

Eyelets are critical for securing a tarp.

Look for:

- Solid brass eyelets, • Reinforced corners, • Strong stitching and rope edges

These features help prevent tearing and extend the tarp's lifespan.

Fleximake / Tarpfactory Tarps:

- ✓ Solid brass spur-tooth eyelets
- ✓ Optional D-Rings on sewn triangle patches at 1 m intervals
- ✓ 4-layer reinforced corners with heavy-duty stitching and rope edges

4. Buy from a Trusted Australian Supplier

Choose suppliers with local stock and warehouse facilities. This ensures **consistent quality, faster delivery, and reliable customer support.**

Maximising Tarp Life

Use All Eyelets

Securing every eyelet helps distribute wind force evenly and reduces the risk of eyelets tearing out.

Snug installation

Keep the tarp tight enough to prevent wind from lifting it, but not overly stretched to avoid stress on the fabric.

Use ropes and shock cords

To prevent a tarp from flapping in the wind and weakening over time, use ropes and shock cords to keep it taut and secure.

Avoid water pooling

Water pooling on a tarp adds weight, strains eyelets, and can damage waterproofing. Install the tarp to allow rainwater and condensate to run off, preventing pooling, especially when used as an awning.

Protection from sharp edges

To protect the tarp from tears and abrasion, keep sharp objects away or cover them with thick cardboard before placing the tarp over them.

Reduce Dragging

To avoid tears or damage to the tarp, avoid dragging it over sharp edges; instead, lift it on and off the items being covered.

Avoid sharp and heavy impacts

Dropping sharp or heavy objects on a tarp can cause localized damage, even if it has high tensile strength. To prolong its life, avoid sharp and heavy impacts.

Dry Before Storage / Store Undercover

To avoid tears or damage to the tarp, avoid dragging it over sharp edges; instead, lift it on and off the items being covered.
